Enabeling Worldwide Voluntary Services!

Sozialer Friedensdienst Kassel e.V.

Young people can raise our hopes.

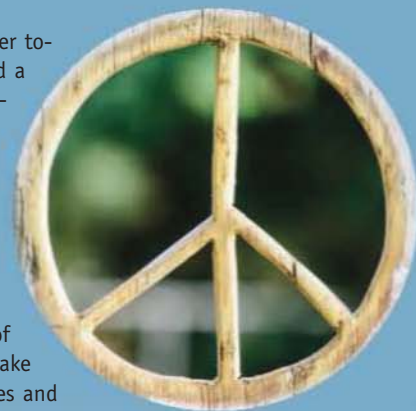

Many of them see the world with open mind and heart, they still have a pure way to perceive the things of life, and – that is the point – they are passionate to change things for the better. It is our concern to inspire those young people in the long term: to be peaceful, righteous and to feel responsible for the environment.

To achieve this, we do not leave it by cherishing high ideals. We actively rely on our volunteering services: We send young people to the world, where they can contribute and strengthen their individual skills in the sense of promoting peace. Our volunteers learn vividly – and with educational support –, how other people, cultures and countries tick. With their on-the-spot-tasks they not only get to know a specific work routine, but also learn to sharpen their socio-political awareness and to work on solutions for crises and conflicts.

We are committed to greater tolerance, social equality and a better understanding between the peoples and cultures.

We, The Social Services for Peace Kassel (sfd) stand for the promotion of peace. Our members and employees share the idea of a society, in which people take responsibility for themselves and their environment. The sfd is responsible for volunteering services and as such the link between volunteers and assignment locations worldwide.

We also run an education center, the Marienhof in Kassel Rothenditmold. Here we initiate encounter projects for people in and around Kassel, for schools and networkpartners. As supporter for youth welfare we focus on strengthening intercultural care.

What about you? You could be our new assignment location and, as such, put our thoughts of a humanitarian and non-violent world into practice.

We look forward to you!
